

U.S. PATENT OFFICE  
AUG 16 2006

AUS920030881US1

1/11

**FIG. 1**

FIG. 2

```

w = image.getIconWidth (); h = image.getIconHeight ()
self.imageSubset((0, 0, 0, 0), (w, h),
{"imageName":imageName, "fit":true})

```

Controller  
(Client Computer)

Projection Screens (Display Devices)

- Sized to fit one cell
- Size and position control is done by the client

**FIG. 3A**

```

w = image.getIconWidth (); h = image.getIconHeight ()
self.imageSubset((0, 2, 0, 2), (w, h),
{" imageName":imageName , "fit":true})

```

- Sized to fit one cell
- Size and position control is done by the client

**FIG. 3B**

```

w = image.getIconWidth (); h = image.getIconHeight ()
self.imageSubset((2, 0, 2, 0), (w, h),
{"imageName":imageName, "fit":true})

```

Controller  
(Client Computer)

- Sized to fit one cell
- Size and position control is done by the client

**FIG. 3C**

# Size Control —

```
w = image.getIconWidth (); h = image.getIconHeight ()
self.imageSubset((2, 2, 2, 2), (w, h),
{"imageName":imageName, "fit":true})
```

BEST AVAILABLE COPY

6/11

- Sized to fit one cell
- Size and position control is done by the client

**FIG. 3D**

```

w = image.getWidth (); h = image.getIconHeight ()
self.imageSubset((0, 0, 2, 2), (w, h),
{" imageName":imageName , "fit":false})

```

Controller  
(Client Computer)

Screen

- Sized to fit all cells (I.e., x: 3x, y: 3x)

**FIG. 4**

FIG. 5

- Sized to fit selected cells
- Negative offset (-x, -y) equal to cell upper left position in grid

**FIG. 6**

10/11

**FIG. 7**

BEST AVAILABLE COPY

11/11
